Flow

Every inquiry, answered on time.

This guide gets your website inquiries flowing through your own n8n in about an hour. Page 2 is your setup checklist; page 3 explains the day to day and how to get help.

HAVE THESE READY

- [ ] n8n, Cloud or self hosted with Data tables
- [ ] An Anthropic API key
- [ ] A Resend account and API key
- [ ] Access to your domain's DNS
- [ ] Optional: a Cloudflare account

YOUR PURCHASE

Your plan, order reference and the date your setup help ends are in your download email.

Need help? Reply to that email with the step number from page 2 and what you see.

Six steps, in folder order.

- [ ] 01 **Add two credentials in n8n** — 5 min

  Bearer Auth named **Resend API** with your Resend key, and Anthropic named **Anthropic** with your API key.

- [ ] 02 **Create the tables · `1-tables`** — 10 min

  Create flow_settings, flow_inquiries and flow_events from the CSVs, then delete each sample row. Keep exactly one settings row.

- [ ] 03 **Fill your settings · `2-presets`** — 15 min

  Start from the closest preset, replace every example value, and make an intake key with `openssl rand -hex 24`.

- [ ] 04 **Import the workflows · `3-workflows`** — 15 min

  Import 0 to 5. Pick your credentials, set Error workflow to Flow · 0 Error alerts, and set your time zone. Publish 0, then 1 to 4.

- [ ] 05 **Connect your form · `4-website`** — 15 min

  Use the Cloudflare Worker (guides/cloudflare.md) or a server forwarder. Never put the intake key in browser code.

- [ ] 06 **Test before going live · `5-test`** — 20 min

  Run curl-test.sh: an owner alert should arrive within a minute. Then work through the 17 checks in test-checklist.md.

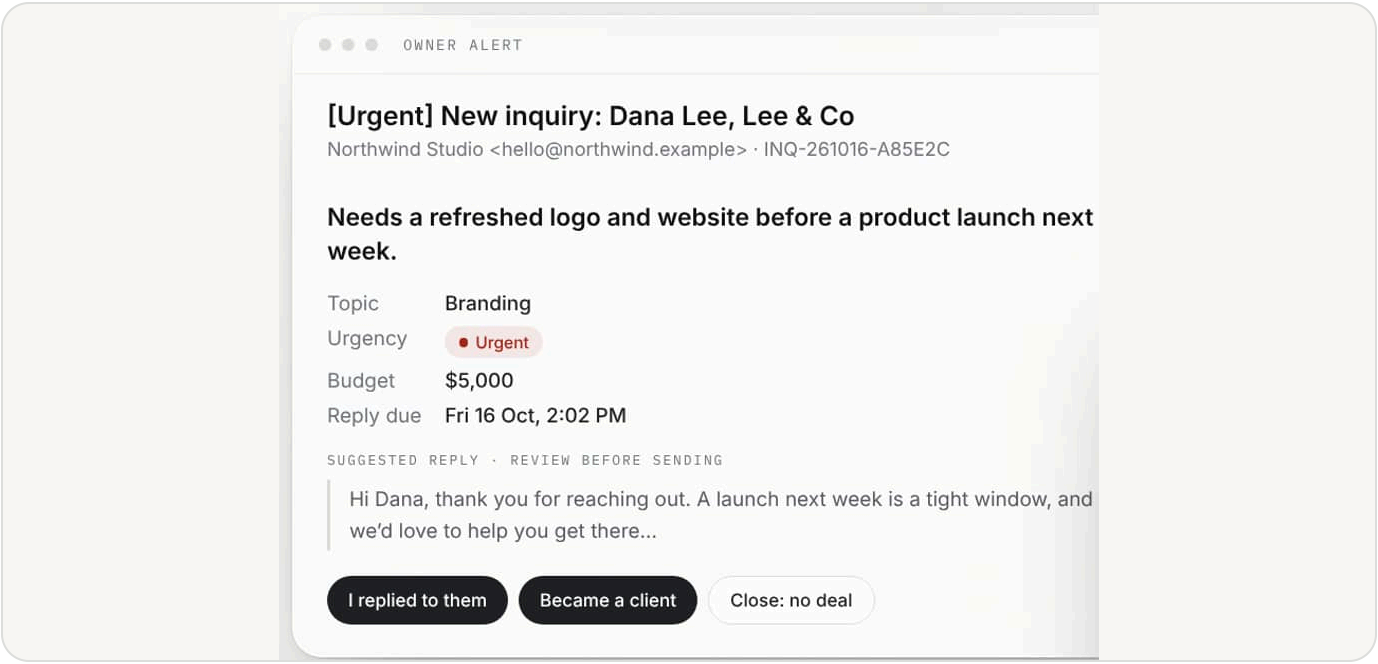

Form returns 401?

The intake key in your Worker or server does not match intake_key in your settings. Copy it again with no spaces.

No emails at all?

Select Resend API in each email node and verify your sending domain in Resend.

Once it is live, you only press buttons.

I replied to them

Stops reminders. Nothing is sent to the client.

Became a client

Sends your welcome and onboarding email the first time.

Close: no deal

No reply, went elsewhere, or a test. Nothing is sent.

EVERY INQUIRY	An alert with a summary, urgency, budget and a suggested reply for you to review. Flow never sends an AI written reply to a prospect.
WEEKDAYS	9am, 1pm and 5pm: one reminder for anything past its reply target.
MONDAYS 8AM	Your digest: new inquiries, wins, losses, time to handle and who is still waiting.
IF ANYTHING FAILS	An error alert names the workflow and step, with no customer data.

GETTING HELP

Reply to your download email with the step number and what you see. Starter: setup help by email for 14 days. Professional: email support for 60 days and your setup call.

UPDATES AND YOUR DATA

Bug fix updates to v1.x for 12 months; see CHANGELOG.md. All inquiry data stays in your own n8n. Benjaire never has access.
